

**Making a Business Case Workshop**  
**APIC-SFBA Chapter**  
Objectives

1. After the workshop participant will be able to:  
Use available tools to assess and quantify the resources of an Infection Prevention Program
2. Enhance the Infection Control program in order to use facility's resources effectively to accomplish:
  - a. reduced infection risk
  - b. improved patient outcomes
  - c. stewardship of facility's resources (human and non-human)
3. Identify and communicate the costs and benefits of adding additional resources to Infection Prevention to other departments and hospital administration
4. Clearly state specific goals and measurable objectives to be attained by adding additional resources requested
5. Learn presentation strategies of cost/benefit analyses in order to make a case for gaining approval for needed resources
